

Architectural features such as wood-trimmed archways, coffered ceilings, and detailed staircases add lots of interest to a space. For rooms that lack those custom touches, choosing furnishings that echo familiar architectural forms can elevate the space and create a sense of character. From custom range hoods and dimensional tile to parquet floors and statement mirrors, our showrooms offer a wide array of products that add the finishing touch to any space.

SCULPTURAL TILE

Three-dimensional tile transforms walls into sculpture, as seen in these richly-textured designs. The MADE by Ann Sacks line (top left) introduces *Apex*, a stoneware collection of five dimensional geometric patterns in fourteen artisanal glazes. *Duomo Dimensional* (bottom left) is a carved marble mosaic from Artistic Tile that draws its inspiration from the architecture of the Art Deco era. Petra's *Carved Stone Collection* (opposite page) is an assortment of unique geometric designs that are hand-carved from thick, natural stone by Italian artisans.
