

The foyer exemplifies timeless elegance with its classic millwork and checkered marble floor.

FORMAL INTRODUCTION

“The foyer sets a formal tone leading into the dining room,” Yellen says. The designer balances original and new elements to give the space a seamless, modern feel. Some of the original features include the door casing and crown millwork, as well as the stair spindles and handrail. The older flooring was torn out and replaced with marble tiles in a checkerboard pattern. “To keep things interesting and give the space a bit of a modern edge, we introduced a second pattern through the stairway runner,” Yellen says.
